

Ticket ID	Alert Message	Severity	Details	Ticket status
A-2703	SERVER-MAIL Phishing attempt possible download of malware	Medium	The user may have opened a malicious email and opened attachments or clicked links.	Escalated ▾

Ticket comments
A phishing email containing the malicious attachment bfsvc.exe was received by an employee. The file hash was verified as malicious using VirusTotal. This alert was escalated because the email contained a confirmed malicious attachment, the alert severity is Medium, and the sender's email address is suspicious and does not match a legitimate organization. The attachment could compromise the user's system, so the incident requires further investigation by a Level 2 SOC analyst.

Additional information

Known malicious file hash:
