

Security organization worksheet

Part 1: Describe your security interests

- Cloud Security
- Incident Response and Threat Detection
- Application Security

Part 2: Identify three organizations and include their mission or objectives

- **1. Cloud Security Alliance**

The organization promotes secure cloud computing by developing best practices, research, education, certifications, and industry standards. It helps organizations securely adopt cloud technologies while advancing AI and Zero Trust security initiatives.

- **2. OWASP**

OWASP is a nonprofit organization focused on improving application security through free tools, educational resources, security standards, and community projects such as the OWASP Top 10 to help organizations reduce software vulnerabilities.

- **3. ISC2**

ISC2 advances the cybersecurity profession by providing globally recognized certifications, training, professional development, and ethical standards that prepare security professionals to protect organizations from evolving cyber threats.

Part 3: Write out which organization aligns with your interests and why

- **Cloud Security Alliance (CSA)**

- CSA closely matches my interests because I want to build a career in cloud security and learn industry best practices. Its research, certifications, and focus on cloud, AI, and Zero Trust make it the best fit for my long-term career goals.

- **OWASP**

- OWASP aligns with my interest in application security and secure software development. Its free resources and practical projects help security professionals identify and prevent common application vulnerabilities.

- **ISC2**

- ISC2 supports my professional growth through globally recognized cybersecurity certifications and training. While it is valuable for career advancement, my primary interest is cloud security, making CSA a stronger fit.

- **Best choice for my professional interests:**

- The Cloud Security Alliance best matches my professional interests because I want to build a career in cloud security and threat detection. Its research, best practices, certifications, and community resources will help me develop practical skills and stay current with emerging cloud security trends.
